02 Features : Must Have

03 Features : Good To Have

04 Technology to be used

Idea

We will create a platform that will allow writers to write content and a gist of that content will be shown. The magazine owners/publishers/readers can then look for the gist of content on this website and if they found it interesting they can pay for it and the writers will be then able to create some profit by writing. This platform will not be limited to english stories and will also allow hindi stories to be sold as well... including hindi / english poems... in order to encourage writers.

Features : Must Have

- Authentication Page :
 - Login
 - Sign Up
- List Product/Service Page
 - Search Bar
- Product/Service Detail Page
- My Cart
 - payment gateway
- Email notification system
 - For notifications as well as sending the soft copy of the content purchased

Features : Good To Have

- Star Ratings for different products by users
- Recommender system based on the previous searches and purchases by users

Revenue Model

- We will charge the users as subscription fees for publishing their content on the platform.
- We will charge some extra fees from the users who are buying the content.

Technologies to be used:

React

HTML

CSS

JS

Mongo DB/Firebase

Thank You
